### PROFILE SUMMARY

Frontend Developer with hands-on experience building responsive web interfaces using HTML, CSS, JavaScript, and ReactJS. Adept at replicating real-world UIs (such as PiggyVest, Meta, and Coolors.co), integrating APIs using Axios, and leveraging AI tools like ChatGPT and Adobe Firefly to streamline development. Passionate about transitioning into a full-time tech career after a solid foundation in science education, combining problem-solving with creativity and user-centered design.

### PROJECT HIGHLIGHTS

#### PiggyVest Navbar Clone

- Built a responsive, hover-enabled dropdown navigation menu using React and TailwindCSS.
- Used useState for dropdown toggling and react-router-dom for routing between pages.

#### E-commerce Product Fetch App

- Consumed FakeStoreAPI using Axios to display product listings dynamically in React.
- Implemented error handling and API lifecycle using useEffect.

#### Meta About Page Clone

- Recreated the layout and typography of Meta's about page using semantic HTML and CSS Grid.

#### Coolors.co Hero Section Replication

- Replicated the hero section of Coolors.co with logos, call-to-action buttons, and branding layout using CSS Flex and Grid systems.

### TECHNICAL SKILLS

- Languages & Frameworks: HTML5, CSS3, JavaScript (ES6+), ReactJS, JSX, TailwindCSS
- API Integration: REST APIs, Axios, React Hooks (useEffect, useState)
- Version Control & Tools: Git, GitHub, Vite, NPM, VS Code
- AI & Design Tools: ChatGPT, Adobe Firefly, Udio, InShot, Canva
- Frontend Design: Responsive Layouts (Flexbox, Grid), UI/UX Concepts

### EDUCATION

- Diploma in Software Engineering (Ongoing)
- SAIL Innovative Hub, Lagos — 2024 – Present
- B.Sc. in Biology Education
- University of Benin, Benin City — 2016 – 2020

**INTERESTS:** Building interactive web interfaces, Exploring AI tools for creative development, UI/UX design principles, Science education and tech integration.
